

KEY INFORMATION DOCUMENT

BMx TMR asset token

Last updated January 28, 2019

PURPOSE

This document provides you with key information about this investment product. It is not marketing material, solicitation to make a purchase or investment advice. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this products and to help you compare it with other products.

PRODUCT DESCRIPTION

Product Name	BMx TMR asset token
Issuer (or Manufacturer)	BMC Group SPC Ltd on behalf of and for the account of its segregated portfolio BMC CIT SP
Underlying Asset	A portfolio that includes top 20 coins by market capitalization rebalanced under mean reversion theory, where tokens likely to outperform the portfolio get more weight. The portfolio also features a dynamic allocation to and from USD(T) subject to the cryptocurrency market performance. Portfolio composition is available on www.blackmoon.net
Asset Token Value	Determined by dividing the Underlying Asset Value related to the total amount of the Underlying Asset held by relevant Token Issuer by the number of Asset Tokens attributed to such Token Issuer and outstanding at the calculation date, including Blocked and Inactive Asset Tokens, rounded to the nearest cent.
Creation Fee	1% for EUR, USD and cryptocurrencies
Redemption Fee	1% for EUR, USD and cryptocurrencies
Service Fee	1.50% per annum
Minimum investment	As specified on Blackmoon Platform
Redemption Frequency	Continuous

Contribution Currencies	BTC, ETH, EUR, USD
Restricted Jurisdictions	Not available for residents of Australia, Bosnia and Herzegovina, Canada, Cayman Islands, Democratic People's Republic Of Korea (DPRK), Ethiopia, Japan, Iran, Iraq, New Zealand, Hong Kong, Singapore, South Africa, Sri Lanka, Syria, Trinidad and Tobago, Tunisia, Uganda, Yemen.
Maturity	365 days
Further information	You can find more information about on products in our website www.blackmoon.net . Blackmoon's customer support team is available via email or live.

RISK WARNING

The product may not be suitable for all investors, please ensure that you fully understand the risks involved and read the full [General Risk Disclosure](#).

WHAT IS THE PRODUCT

Objectives: Blackmoon issues a digital token replicating the performance of a certain underlying asset. An investor might store the evidence of ownership on his own blockchain address, where such investor holds the private key to his record, or store such records on the Blackmoon blockchain network. BMx TMR token is intended to provide a return as close as possible to the underlying assets – **the portfolio includes top 20 coins by market capitalization rebalanced under mean reversion theory, where tokens likely to outperform the portfolio get more weight, and the strategy goes to cash when the market goes down.**

Intended investor:

The product is intended for investors who have above average knowledge and experience in financial markets as well as blockchain technology and cryptocurrencies and are able to bear the risk of the loss of the entire investment. Investors with low income, low risk tolerance and no knowledge/experience in complex financial instruments or cryptocurrencies **will not** be able to purchase the asset tokens. Prospective investors should ensure that they understand fully the nature of these tokens and should consider the suitability of an investment in the tokens in the light of their own particular financial, fiscal and other circumstances knowledge, experience and risk appetite.

RISK AND REWARD PROFILE

The summary risk indicator is a guide to the level of risk of this product compared to other financial products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as **7 out of 7** based on the requirements of Commission Delegated Regulation 2017/653 and ESA Guidelines for summary risk indicator. For the purposes of this assessment, the asset token is considered to be a derivative product and assigned the highest Market Risk Measure (MRM).

A loss is made if the asset token is sold at a lower rate than the purchase price paid. Such a negative scenario can occur if value-determining factors - for example, market conditions and/or market volatility - have a negative effect on the underlying asset. Asset Tokens do not provide for any capital protection, meaning that the investors may incur a total loss of the capital invested.

In addition, prospective investors should note the existence of the following risks:

Liquidity: Asset tokens issued by Blackmoon are not tradeable in regulated markets, and such regulated market may not exist in the lifetime of this product. Limited liquidity may have negative impact on the asset value.

Currency: Cryptocurrencies are highly volatile assets, and their prices fluctuate widely throughout the day. The asset token value may be negatively impacted by the difference in the value of the redemption currency between the purchase and the sale date.

Regulation: Regulation of digital tokens (including the Asset Tokens) and token offerings such as this, cryptocurrencies, blockchain technologies, and cryptocurrency exchanges currently is undeveloped and likely to rapidly evolve, varies significantly among international, federal, state and local jurisdictions and is subject to significant uncertainty.

Performance scenarios

Maximum gain: Underlying performance

Maximum loss: 100%

Scenario	Positive	Breakeven	Negative
Indicative Performance of the Asset token	Positive performance (outperforming ETH or BTC)	0%	Loss up to 100% of investment amount
Necessary performance of the underlying	Closing price of the underlying assets within the portfolio is higher than the reference price level at the time of the investment	Closing price of the underlying asset = reference price level at the time of investment	Closing price of underlying assets within the portfolio is lower than the reference price level at the time of investment

WHAT ARE THE COSTS?

Please refer to Creation, Redemption and Service Fees.

Service fee is a fee payable by a Token Holder to the Token Issuer to compensate possible expenses of the Token Issuer for providers of Investor support services, including to respond to Investors' queries and questions, and provide Investors with information about their investments. Such fee also covers IT services, preparation of investor materials, legal support and, if applicable, audit fees.

The Issuer reserves the right to amend creation, redemption and service fees at its discretion.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

A minimum retention period is not applicable; you can redeem your asset token at any time, subject to daily redemption limits as may be established from time to time by the Issuer.

WHAT HAPPENS IF BLACKMOON IS UNABLE TO PAY OUT?

If Blackmoon is unable to meet its financial obligations to you, this could cause you to lose the total value of your investment with Blackmoon. At the moment, Blackmoon is not a member of Investor Compensation Fund.

HOW CAN I COMPLAIN

If you wish to complain, you can contact our customer support. Resolution will be provided in accordance with Blackmoon's complaint handling policy. You may submit your complaint by contacting our Customer Services team or e-mailing us at compliance@blackmoon.net.

OTHER RELEVANT INFORMATION
